

Cloud International Logistics Business System

4/9/2018

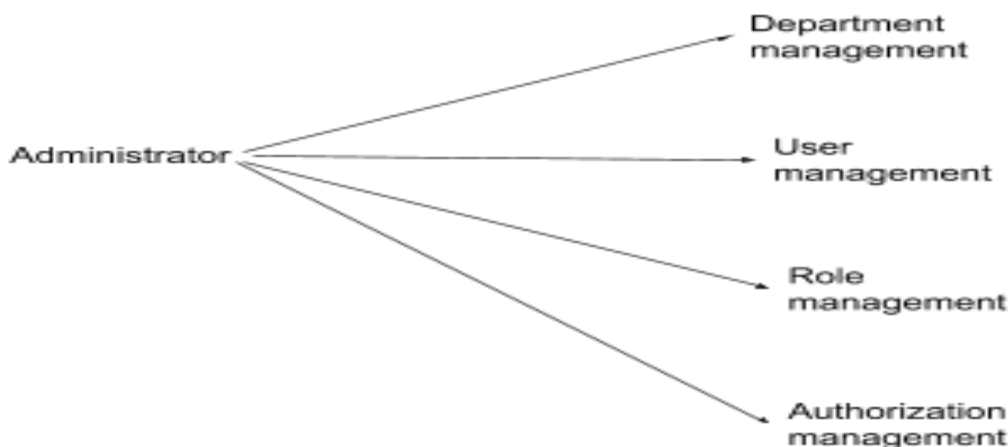

Yumei Qu

Background:

As company growing, the previous system - Business Management Platform is not able to fulfill requirements of business. Cloud International Logistics Business System has 5 steps:

1. Complete inventory management: the functions include: buyer, inventory, products, barcode, stock in, stock out, returns, stock, stock limits alarm, static search;
2. Complete products management: the functions include: purchase and sale contract, shipping statics, export declaration, invoices, financial statics etc.
3. Complete strategy analysis: the functions include: cost static graphic, sale analysis statics, VIP customer, sale compare, work performance.
4. Complete front end: the functions include: user login, registration, resource upload, search.
